INSTALLATION

Sealant can be used on all joints to aide in sealing.

Sealant should be used between the waste body (3) and the basin surface.

Once the sealant has been applied, place the waste (1) and rubber washer (2) into the basin.

From the underside fit the rubber washer (3), over the waste tail.

Finally connect the backnut (4) to waste tail and tighten until secure.

Finally waste trap (not supplied) should be fitted.

In order to fill the basin, the button in the middle of the waste needs to be pressed down.

To release water press the button needs to be raised.
