## Troubleshooting

Symptom	Cause(s)	Resolution
No flow or low flow rate	Partially closed isolation valve	Open isolation valve
	Instantaneous water heater cycles on and	Increase water flow rate or pressure
	off as flow rate or pressure is too low	through system.
	Air lock or partial blockage in the supply	Flush through pipework to ensure
	pipework or hoses	removal of debris and any airlocks.
	Hot or cold water being drawn off	
	elsewhere causing pressure chnages or	Try not to use other water outlets when
	instantaneous boiler temperature	using the mixer
	changes.	
Water dripping from the mixer	This is normal for a short time after using	This is due to residual water tension, the
	the mixer	build up of water in the tap body.
	If water continues to drip, possible issue	Di
	with the flow control cartridge.	Please contact our customer care team.
Mixer does	Closed isolation valve	Open isolation valve
not turn on	Mains water supply turned off	Turn on mains water supply

#### **Installation Requirements**

Before commencing installation of the new product, ensure that the system has been flushed to remove any debris, which could cause damage to the valves and invalidate the warranty.

#### Installation

Drill four holes on the bath as per the drawing if required.

#### Install the Spout

- 1. Remove the tee connector (31), nut (34), Fixing Kit (11,12 & 13) from spout tail.
- 2. Then place the spout inlet connector (21) through the second from left bath hole with the base plate (19) under spout.
- 3. Slide the Fixing Kit (11,12 & 13) over the inlet connector (21) and tighten with screw driver.

## Install hot/cold control valve

Hot to be installed on the Left of the Spout Cold to be installed to the Right of the Spout.

- 4. Fitting the Hot Control Valve first on the left of the spout.
- 5. Remove Handle, Stem and Base Plate (1,2, 3, 7 & 8) from Valve Body (14).
- 6. Place the Valve Body (14) through the 1st hole in the bath from the underneath.
- 7. Replace the Handle (1,2 & 3) back on the Valve Body (14) Tighten the handle with allen key.
- 8. Slide the Fixing kit over its tail and tighten with screw driver. Hole 1 should now be installed as per image
- 9. Follow the same way to fit the cold control valve.
- 10. Connect the tee connector and the hot/cold control valves using braided hoses.
- 11. Put the tail for the handset holder through the 4th hole, tighten with the backnut.
- 12. Adjust all parts in their position and then tighten all connections.
- 13. Connect the shower hose from the connection under the spout through the handset holder in hole 4.
- 14. Connect the handset to the Shower hose.
- 15. Connect water supplies and the hot/cold control valve. Check for any  $_{\rm 6}$  leaks.

Please keep these instructions for future reference and request of replacement parts

#### **General Safety Information**

Please read all of the instructions before installation.

Methven recommends this product is installed by a competent person in compliance with all relevant regional regulations.

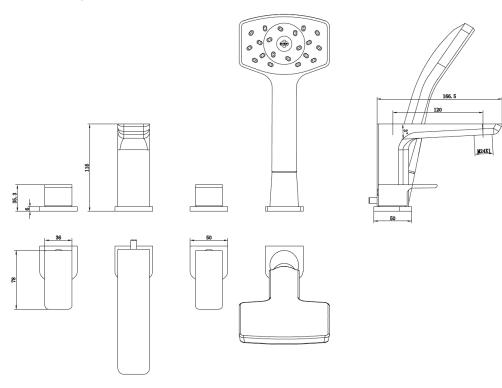

Remove all packaging and check the components for damage before starting installation.

This product  ${\it must}$  not be modified in any way as this will invalidate the guarantee.

It is the responsibility of the installer to ensure a waterproof seal is achieved, after installation all connections must be checked for leaks.

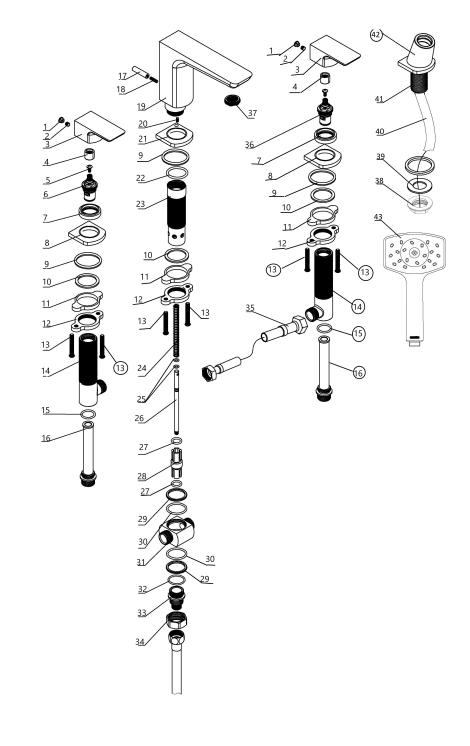

All outlets used primarily for personal hygiene shall deliver water at a safe temperature as per regional regulations.
